PLEASE ANSWER ALL THE FOLLOWING QUESTIONS

Please outline why the nominated individual/organisation should be considered for the award?	<p>Ecolibrium is pioneering the way forward in sustainability tech by empowering organisations with data-driven solutions that make a tangible difference in their decarbonisation journeys. Chintan Soni, the dynamic co-founder and CEO of Ecolibrium, is leading the company with an impressive 20-year career. Chintan's vision and leadership are the driving forces behind Ecolibrium's steadfast dedication to innovation and sustainability. Our flagship platform, SmartSense by Ecolibrium is an AI-powered decarbonisation platform. It transforms how companies manage their carbon footprint, seamlessly integrating automated recommendation engines with real-time actionable insights. By creating digital twins of client portfolios, SmartSense provides a single-pane view that drives measurable actions to meet Net-Zero goals. Ecolibrium has proven its capability in reducing carbon footprints, enhancing productivity, and optimizing operational costs for over 80 clients across 500+ sites globally. Ecolibrium stands out by promoting sustainability, enhancing productivity, and reducing operational costs, striking a harmonious balance between people, planet, and profit. Our proprietary AI/ ML algorithm collects, visualises, analyse, and generates insights from the get-go. We deliver deep, actionable insights in 30-60 days, generating value and optimising performance. Our extensive application library covers over 90% of all industrial equipment, and clients gain contextual, interconnected, macro-to-micro-level insights. We provide a single view of the client's entire global portfolio, and our clients benefit from our goal-oriented approach. Over the past decade, we have consistently delivered a 20% reduction in energy spend, an 11% increase in productivity, and a 27% reduction in maintenance costs. We believe that our unique approach to integrating technology with sustainability initiatives makes us a deserving candidate for the Eastern Eye property award.</p>

Provide relevant information on the nominee?

Founded in 2012 by Chintan Soni, Ecolibrium is a global leader in AI-powered decarbonisation technology. It is a sustainability tech company that empowers people to make better decisions using proven data-driven ML algorithms, facilitated by continuous monitoring, analysis, and seamlessly integrated automated recommendation engines. Our solutions empower businesses with AI-driven technology, helping them derive intelligence from their data by making the invisible, visible. We deliver real-time actionable insights that enable informed decisions, elevating productivity and reducing operational costs for a greener, more efficient portfolio. Ecolibrium is ISO 27001 certified and adheres to the ISMS framework of standards. We have won several awards over the last decade, including the prestigious WWF Climate Solver Award, the UNFCCC award and the Ashden International Award. Our decarbonisation platform – SmartSense, creates a digital twin of the client portfolio, with every single asset to be generated on one unified dashboard. SmartSense offers powerful dashboards with a library of 100+ applications that help make data-driven decisions to optimise operations. Our impact and presence span 80+ clients, with 500+ sites globally, assimilating 25 million data points daily to deliver a 20% reduction in energy spend, an 11% increase in productivity and a 27% reduction in maintenance costs. At Ecolibrium, we aim to transform by inspiring change and driving growth, we believe in partnering with our clients and we are committed to protection. Central to Chintan's leadership philosophy is a dedication to developing cutting-edge products and nurturing strong leadership teams. His hands-on approach deeply influences Ecolibrium's culture, where innovation is a daily practice, not just an objective. Under his leadership, Ecolibrium excels at the dynamic convergence of sustainability and technology.

List, all qualifications and institutions where the nominee studied

Chintan Soni leads Ecolibrium as its CEO, drawing from a rich educational background in Information Technology Engineering from Bangalore University and a Master's in Telecom Management from Symbiosis International University. His multifaceted career spans significant roles at Schlumberger and Gemalto, where he worked on projects across Singapore, France, and the Philippines. Chintan is a co-holder of two telecom patents and one in predictive maintenance of rotating equipment, showcasing his innovative spirit. A practical leader, he is dedicated to developing innovative products and cultivating robust leadership teams at Ecolibrium, where innovation is embedded in everyday activities. With two decades of invaluable experience, he uniquely leverages technology to create a greener and more efficient world. As an engineer and entrepreneur, Chintan has consistently harnessed cutting-edge technology to balance people, the planet, and profit.

Provide a brief biography of the

Ecolibrium is a global leader in sustainability technology,

nominated individual/organisation

specialising in AI-powered solutions that drive operational excellence, enhance productivity, and accelerate decarbonisation efforts. The cornerstone of Ecolibrium's offering is our de-carbonisation platform, SmartSense, which leverages advanced AI and ML algorithms to convert data into actionable insights. This platform creates a digital twin of client portfolios, providing real-time, unified views of operations that enable informed decision-making and proactive management. In the field of cutting-edge technology, Chintan Soni, a graduate of Information Technology Engineering from Bangalore University, Chintan holds a master's degree in Telecom Management from Symbiosis International University and is the dynamic co-founder and CEO of Ecolibrium, guiding the company's path with a distinguished 20-year career. Chintan is the driving force behind Ecolibrium's steadfast dedication to innovation and sustainability. Ecolibrium empowers organisations to achieve their Net-Zero goals while improving operational efficiency. With a strong focus on the balance between people, planet, and profit, Ecolibrium delivers solutions that significantly reduce energy consumption, optimize asset performance, and enhance overall sustainability. The company's proprietary technology collects, visualises, and analyses data from various systems, identifying inefficiencies and providing targeted recommendations that drive cost savings and productivity gains. Operating in diverse industries, Ecolibrium serves over 80 clients across more than 500 sites worldwide, processing 25 million data points daily. This extensive reach and data-driven approach have led to impressive outcomes: an average 20% reduction in energy spend, an 11% increase in productivity, and a 27% reduction in maintenance costs over the past decade. Furthermore, Ecolibrium's clients are on a faster trajectory to meet their Net-Zero commitments, achieving these goals 20% quicker than traditional methods. Ecolibrium's success is built on its commitment to collaboration and innovation. The company partners closely with clients, ensuring that solutions are tailored to specific needs and that implementations are seamless. This partnership extends beyond technology provision; Ecolibrium's team of experts works alongside clients to ensure continuous improvement and sustained impact. The company's values of transformation, partnership, and protection are evident in every aspect of its operations. Ecolibrium fosters a culture of creativity and relentless pursuit of innovation, inspiring change and driving growth. By positioning itself as a trusted partner, Ecolibrium ensures that clients achieve their sustainability and operational goals, creating a positive and lasting impact on their businesses and the environment. Ecolibrium's excellence has been recognised with several prestigious awards, including the WWF Climate Solver Award, the UNFCCC award, and the Ashden International Award. These accolades underscore the company's leadership in sustainability and its contribution to global environmental efforts. Ecolibrium stands out as a beacon

of innovation and sustainability in the property, manufacturing, and Data Centre sectors. Its AI-powered platform, SmartSense, not only delivers significant operational benefits but also drives the broader goal of environmental stewardship. Ecolibrium's dedication to making a tangible difference positions it as a deserving candidate for the Eastern Eye Property Awards.
